Nairobi, Kenya | kalkyokya4@gmail.com | <https://github.com/kal-kyokya> | <https://kalkyokya.tech>

SUMMARY

Backend Software Engineer with experience designing, building and deploying full-stack web applications using Python, Django, Django REST Framework, PostgreSQL and React. Founder and lead engineer behind Futtech, a football technology platform combining secure backend systems, AI-powered football analysis and cloud video infrastructure. Experienced with Linux server administration, REST API design, authentication systems and production deployments using Gunicorn and Nginx.

EDUCATION

ALX Africa

Backend Web Pro Development

ALX Africa

Software Engineering (Backend)

ALX Africa

AI Starter Kit

Kenyatta University

B.Sc. Electrical & Electronics Engineering (Completed coursework)

EXPERIENCE

Founder & Backend Software Engineer

2024 – Present

[Futtech](#)

- Architected the backend using Django and Django REST Framework.
- Designed PostgreSQL database models supporting users, media and application data.
- Built secure authentication and authorisation workflows.
- Developed REST APIs powering a React frontend.
- Integrated Bunny Stream for video uploads, streaming and subtitle support.
- Implemented Redis to support scalable backend architecture.
- Deployed production services on a Linux VPS using Gunicorn and Nginx.
- Configured deployment workflows and maintained production infrastructure.
- Developed AI-assisted football analysis features.
- Integrated third-party APIs supporting media processing and platform functionality.
- Managed Git repositories and collaborative software development workflows.
- Core Technologies: Python • Django • DRF • PostgreSQL • Redis • React • Linux • Gunicorn • Nginx • Bunny Stream

Software Engineering Team Lead

2024

ALX Africa

- Led a four-developer team during a software engineering project.
- Coordinated sprint planning and technical communication.
- Managed collaborative Git workflows and project delivery.
- Delivered project milestones using Agile methodologies.

Freelance Technical Projects

2023 – Present

- Delivered software and digital projects for international clients.
- Collaborated remotely with clients across Europe.
- Produced technical documentation, multilingual localisation and digital solutions.

PROJECTS

Futtech | Football technology platform combining backend engineering, cloud video infrastructure and AI-powered football analysis.

- Django REST Framework backend
- PostgreSQL database
- React frontend
- Secure authentication
- Bunny Stream integration
- Redis caching
- Linux VPS deployment
- Gunicorn + Nginx production stack

Everything-IoT | IoT platform connecting embedded systems with cloud-based dashboards.

- Flask backend
- SQL database
- REST APIs
- Device monitoring
- Responsive web interface

Personal Portfolio | Personal website demonstrating Linux deployment and modern web development.

- VPS hosting
- Nginx configuration
- Custom domain management
- Responsive frontend
- Production deployment

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, Bash, C, HTML5, CSS3

Backend: Django, Django REST Framework, Flask, Node.js, Express.js

Frontend: React, Vite, Sass

Databases: PostgreSQL, Redis, MongoDB, MySQL

DevOps & Infrastructure: Linux, Git, GitHub, Gunicorn, Nginx, PM2, CI/CD, VPS Deployment

Cloud & Integrations: Bunny Stream, Firebase, REST APIs, JSON

Practices: Authentication & Authorisation, Database Design, API Integration, Agile Development

LANGUAGES

English (Fluent) • French (Fluent) • Kiswahili (Fluent) • Lingala (Fluent)
